HONORS STUDENT NEWSLETTER

Ysabella Lucero Ysabella

What is an east bay kid doing at a west bay school like Cañada?

The answer is the Honors Transfer Program!

Meet Ysabella Lucero. Ysabella grew up in the east bay and, after graduating high school, enrolled in a four-year school in Southern California. However, the university was not to her liking, and she returned home. But where to go? That's where the Canada's HTP program comes in.

Turns out Ysabella was really looking for a way into a UC school and noticed how successful HTP students had been at enrolling in these sorts of institutions. In the blink of an eye, Ysabella was one of our newest HTP members. Currently she is working on a microeconomics research paper that attempts to explain why consumers dedicate so much of their disposable income to things like organic foods, even when much of the evidence out there suggests there is little in the way of measurable benefits. Please welcome Ysabella if you have her in your classes.

Ysabella practiced presenting her engaging research at the [IDST 150 Honors Research Seminar](#) this semester. See below for more information about the seminar.

HONORS STUDENT NEWSLETTER

Samuel Trumble explaining his poster at NCHC, Nov. 2023

Congratulations to Samuel Trumble!

Samuel earned second place nationally for his research and presentation and won the Sloane Prize for Undergraduate Research at the [National Collegiate Honors Convention](#) in Chicago!

Samuel's research focuses on the 17th century folklore of Northeastern North America and the "Trickster Tales" of Algonquian and Iroquoian Native Americans, New England colonists, and enslaved African Americans. Samuel was mentored by Professor Michael Stanford and worked with research librarian Chris Burns. [For more information on Samuel's project click here.](#)

Samuel's paper, "The Trickster Archetype in North America" was also published in [Thinkyou?!](#).

Here's a quote from Samuel on his experience:

The whole experience of creating this project and seeing it evolve into a published paper has really shown me what I am capable of. As a nontraditional student I am constantly doubting if school is really the right place for me. After going to Chicago for the NCHC conference and taking second place I have no doubt that I am on the right track to doing something truly significant. (Trumble, 2023)
